Seating & team areas

SPECTATOR SEATS AND COVERED TEAM BENCHES

Stadium Seats

Fixed-back spectator seat

Front view

Side view

Underside reinforcement

Built for busy spectator stands, this fixed-back seat uses UV-stabilized heterophasic block copolymer polypropylene for impact toughness and outdoor exposure. Dense underside ribbing distributes loads across the shell.

Technical specifications

Overall dimensions	43 x 43 x 35 cm
Nominal net weight	1.75 kg
Fixing	Two bolts with large metal washers
Mounting option	Optional bracket for riser mounting
Care and drainage	Smooth finish and drain opening in the seat pan
Design references	EN 13200-4 and EN 12727

Team benches

INSTALLED PROJECTS / 01

Ajand Nouavar designs, manufactures and installs made-to-order stadium benches for substitute players and dedicated seating for match officials. We use high-quality materials and tailor the seating capacity, layout and finish to each venue.

Indoor Team Benches

Designed, manufactured and installed to order for indoor sports halls. We configure the bench length, seating capacity, frame finish and seat colours to suit your venue and requirements.

02

Goals & pitch equipment

FOOTBALL, FUTSAL, HANDBALL AND HOCKEY

Goals & pitch equipment

Standard Stadium Soccer Goal

Full-size official soccer goal for stadiums. Aluminum or steel frame with professional net. Designed for permanent installation on natural or artificial turf.

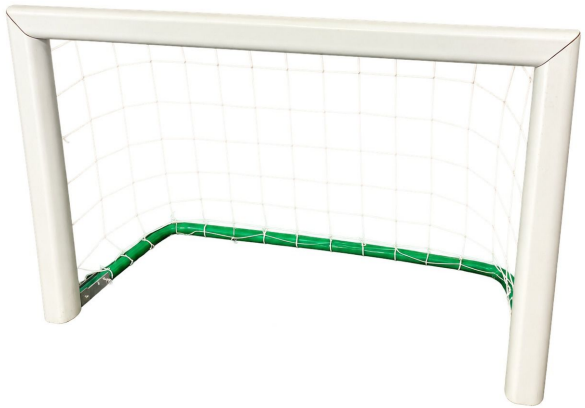
Training Aluminum Soccer Goal

Portable training soccer goal with aluminum frame and white net. Easy to move and store. Ideal for schools, clubs and practice sessions.

Goals & pitch equipment

Standard Aluminum Futsal Goal

Official futsal goal with blue and white aluminum frame and white net. Suitable for indoor halls and outdoor multi-sport courts.



Mini Soccer Goal (Aluminum)

Compact aluminum mini-football goal for youth and training. Lightweight design with white net. Suitable for small-sided games.

Goals & pitch equipment

Mini Soccer Goal (Steel)

Durable steel mini-football goal for youth training. Heavy-duty construction with white net. Ideal for schools and clubs.

Aluminum Beach Soccer Goal

Lightweight yet robust aluminum beach football goal. Yellow powder-coated frame with black net. Designed for sand surfaces with secure anchoring points.

Goals & pitch equipment

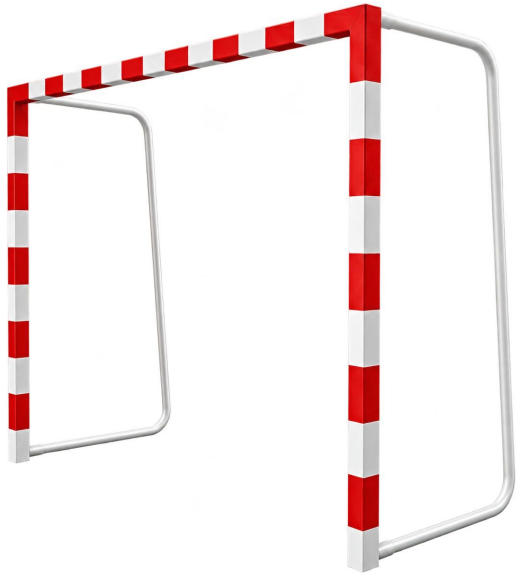
Aluminum Beach Soccer Goal (White Net)

Professional beach soccer goal with yellow frame and white net. Aluminum construction for corrosion resistance in coastal environments.

Field Hockey Goal

Regulation field hockey goal with white frame, green net and lower board protection. Suitable for natural and artificial turf pitches.

Goals & pitch equipment



Handball Goal

Official handball goal with red-and-white striped posts and crossbar. Heavy-duty construction for indoor and outdoor use.

Header Training Pole

Suspended football header training apparatus. Height-adjustable cable system with professional soccer ball. Ideal for technical heading drills and coordination training.

Goals & pitch equipment

Spring Corner Flags (Set of 4)

Official spring-loaded corner flags. Flexible pole with checkered flag. Set of four for complete field marking. Suitable for football and multi-sport pitches.

Manual Football Line Marker

Professional push-type line marking machine for football pitches. Adjustable line width, durable blue frame and roller system. Suitable for natural grass and artificial turf.

Turf Surface Water Collection Roller

Heavy-duty water absorption and collection machine for natural grass pitches. Large absorbent roller with stainless steel tank and manual operation. Improves pitch playability after rain.

03

Court equipment

VOLLEYBALL, BASKETBALL,
BADMINTON AND TENNIS

Court equipment

Telescopic Wheeled Volleyball Posts

Mobile volleyball posts with telescopic height adjustment and wheeled base. Red top sections for net height marking. Suitable for multi-sport halls.

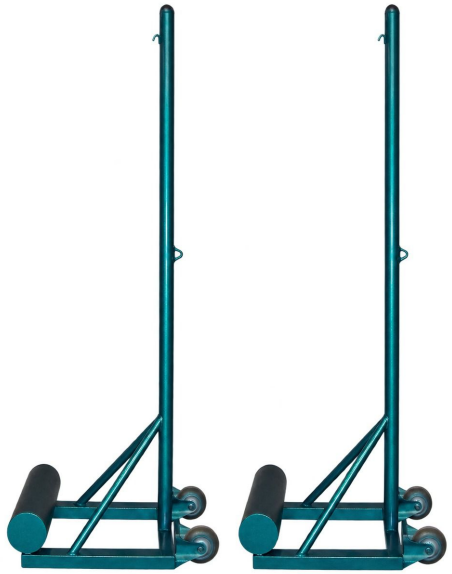
Federation Telescopic Volleyball Post

Official federation-standard telescopic volleyball post with crank height adjustment and red locking collars. Designed for competition venues.

Court equipment

Teflon Telescopic Volleyball Post

Premium telescopic volleyball post with Teflon-coated sliding mechanism for smooth height adjustment. Stainless steel construction with wheeled base.



Badminton Posts

Heavy-duty mobile badminton posts with wheeled base and counterweight cylinders. Telescopic design for easy height adjustment. Powder-coated steel construction for outdoor and indoor durability. Suitable for clubs and multi-sport halls.

Court equipment

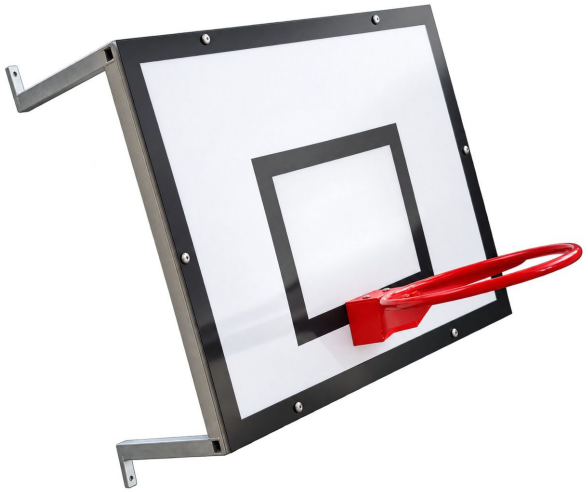
Clay Court Tennis Posts

Heavy-duty tennis posts designed for clay surfaces. Includes net tensioning mechanism and ground sockets. Galvanized or powder-coated finish for long-term outdoor use.

Wall-Mounted Basketball Goal (MBA Style)

Wall-mounted basketball system with fan-shaped backboard, orange rim and white/red net. Designed for indoor halls and gymnasiums. Secure wall fixing with professional-grade mounting hardware.

Court equipment



Rectangular Wall Basketball Goal

Compact rectangular wall-mounted basketball backboard with tempered glass or polycarbonate surface. Red rim included. Ideal for smaller halls, schools and training facilities.

Outdoor Mobile Basketball Goal

Portable outdoor basketball system with wheeled base for easy relocation. Adjustable height pole, durable backboard and professional rim. Suitable for parks, schools and multi-purpose courts.

Court equipment

Fixed Volleyball Referee Stand

Official volleyball referee platform with fixed red seat and writing shelf. Gray steel frame with wheels for mobility. Suitable for indoor and outdoor courts.

Adjustable Volleyball Referee Stand

Height-adjustable volleyball referee stand with yellow seat. Green steel frame with platform and mobility wheels. Ideal for multi-level competition use.

04

Pool equipment

LANE LINES, STARTING BLOCKS AND POOLSIDE ACCESSORIES

Pool equipment

Inflatable Swim Lane Dividers

Durable inflatable lane lines for swimming pools. Multiple colors available. Easy to deploy and store. Suitable for training and recreational pools.

Olympic Style Swim Lane Lines

Competition-grade lane ropes with multi-color disc floats. Includes tensioning system and end floats. Designed for professional swimming pools and competitions.

Pool equipment

Water Polo Goals

Floating or pool-edge water polo goals. Lightweight aluminum frame with white net. Suitable for competition and training pools.

Two-Step Swimming Starting Block

Professional two-step starting platform for competitive swimming. Non-slip top surface, stainless steel or aluminum construction. Compliant with FINA dimensions.

Pool equipment

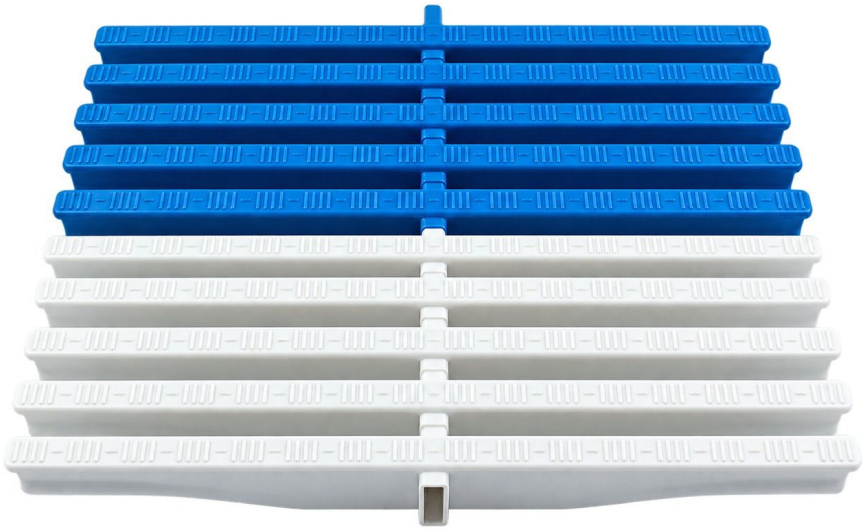
Single-Step Swimming Starting Block

Compact single-step starting block for pools. Blue non-slip platform with stainless steel support. Suitable for training and competition pools.

Lifeguard Chair

Elevated lifeguard observation chair with red seat, stainless steel frame and ladder. Mobile base with wheels for poolside use.

30cm Single-Pin Drainage Grill



Modular plastic drainage channel covers, 30cm width. Blue and white options. High load capacity for sports halls, pool surrounds and outdoor pitches.

05

Training & match accessories

TRAINING AIDS, FLOORING AND TABLE TENNIS

Training & match accessories

Table Tennis Partition

Professional table tennis table partition screen. Durable blue fabric construction with reinforced frame. Ideal for multi-table halls to reduce visual and ball interference between courts. Compatible with standard competition tables.

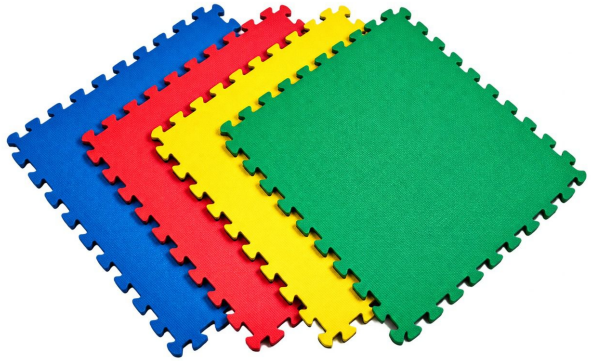
Table Tennis Scoreboard

Professional flip-style table tennis scoreboard. Large numbers, time-out indicators and brand-compatible design. Suitable for clubs and tournaments.

Training & match accessories

Table Tennis Referee Table

Professional black referee table for table tennis competitions. Large surface with storage. Branded design suitable for tournament use.



3cm Interlocking Tatami Mats

EVA foam interlocking floor mats, 3cm thickness. Available in multiple colors. Ideal for martial arts, gymnastics, multi-purpose halls and child activity areas. Easy assembly and non-slip surface.

Training & match accessories

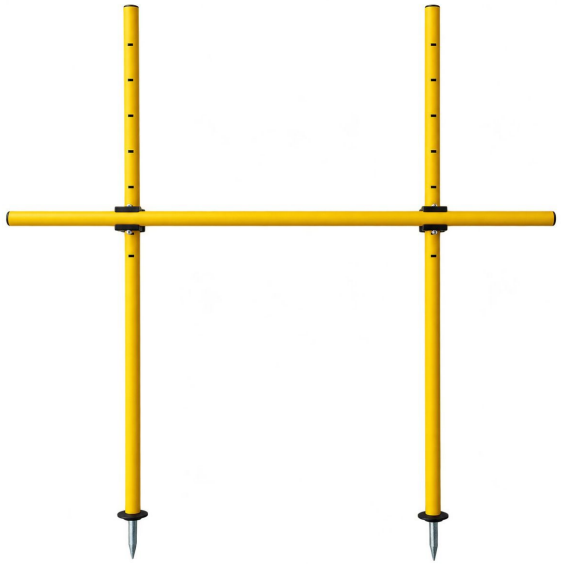
Magnesium / Powder Stand

Professional chalk and powder station for gymnastics, weightlifting and climbing. Stable base with wide bowl. Suitable for training facilities and competition venues.

Training Cones (48 Pieces)

Flexible training cones in multiple colors. Stackable design for easy storage. Ideal for agility, dribbling and coordination drills in football, athletics and multi-sport training.

Training & match accessories



Adjustable Jump Hurdle

Height-adjustable training hurdle with yellow poles and crossbar. Suitable for athletics, football and agility training. Stable base design.

30cm Cone Barrier

Solid 30cm training cone. High-visibility orange. Durable plastic construction for outdoor and indoor use.

Training & match accessories

50cm Cone Barrier

Large 50cm training cone for field marking and drills. Stable base, high visibility. Suitable for football and athletics training.

Double-Spike Agility Pole

Flexible arched agility pole with dual ground spikes. Ideal for weaving and coordination drills on turf or indoor surfaces.

Training Pass Pole

Simple yellow training pole with ground spike. Used for passing accuracy, agility lanes and tactical drills.

06

Lighting Towers and Installation

DESIGN / FOUNDATIONS / MANUFACTURE / INSTALLATION

Complete delivery for your stadium, from design and manufacture to foundations, installation and handover.

Designed around your stadium

From site planning to installation

Ajand Nouavar delivers complete lighting tower projects tailored to your stadium. Our service covers design, tower positioning, manufacture, foundation works, installation and on-site execution, with one team responsible for the full project.

We guide clients in selecting the right towers for their venue, site conditions and budget, then manage the complete scope from planning through installation and handover.

From planning to on-site execution

01 Understand the venue

Discuss the sports played, intended use, site layout and client priorities.

02 Design and locate

Develop the tower arrangement and positioning to suit the stadium.

03 Build towers and foundations

Manufacture the structures and carry out foundation works for the agreed design.

04 Install and deliver

Manage tower installation, on-site execution and project handover.

Choose the right tower for your venue.

Our team supports your decision by considering:

Venue dimensions and sporting use
Tower height and positioning
Foundation planning and site conditions
Installation access and maintenance needs
Project scope and budget

07 Sports flooring

Athletics tracks, indoor halls and sports environments

Illustrative scene

Athletics track surfacing

Client-supplied surfacing samples

Sandwich system

A super-quality layered tartan system for athletics tracks, manufactured using high-quality imported raw materials and premium polyurethane binders.

Spray-coated system

A super-quality spray-finished tartan system using high-quality imported materials and polyurethane, produced with current international manufacturing methods.

Complete athletics track delivery

Premium materials. A complete project service.

Our sandwich and spray-coated tartan systems combine high-quality imported raw materials and premium polyurethane with current international production methods. We help clients select the appropriate system for their athletics facility.

For standard athletics sites, we undertake installation and execution in accordance with the applicable World Athletics requirements. Our service includes coordinating post-installation testing and the process of obtaining the required federation approvals and certification.

Tartan Track Systems

Tartan systems differ in layer count, thickness and surface finish. We specify each build-up around the venue, its intended use and the required level of competition.

Three installation systems

System	Construction and recommended use	Thickness
Spray Coat	A thin, spray-applied finish over a resilient SBR rubber base. A cost-effective option for schools, training tracks and compatible tennis courts.	Project-specific
Sandwich System	PU primer, an SBR granule shock pad, a flexible PU sealing layer and an EPDM wear surface. Suited to standard athletics tracks and regional or national competition.	13–15 mm
Full Pour PU	PU primer and poured polyurethane resin layers with a UV-resistant finish. The resilient build-up provides flexibility and shock absorption for high-level competition venues.	13–15 mm

Smooth-finish tartan can be specified at 15–30 mm for suitable applications. Outdoor drainage depends on the permeability of the selected system and the site drainage design.

Flooring for Sports and Multipurpose Halls

Illustrative hall scene; client-supplied colour samples

Manufacture, installation and on-site application

We offer flooring in a range of thicknesses for different sports and multipurpose activities.

Indoor Flooring: PU or PVC?

For multipurpose halls, we select flooring for the sports played, with attention to shock absorption and ball rebound. The complete system, including its backing, determines how it performs.

System comparison

Feature	Seamless polyurethane (PU)	Roll-applied PVC
Construction	Liquid-applied resin creates a continuous surface that is easy to clean.	Bonded rolls with welded seams.
Shock absorption	Can be tuned through the resilient underlayer.	Depends on the backing and total thickness.
Repairs	Local areas can usually be repaired.	Damage may require replacement of a section or roll.
Typical applications	Professional and multipurpose sports halls.	Schools, fitness halls and multipurpose courts.
Indicative service life	15+ years, depending on use and maintenance.	7–10 years, depending on use and maintenance.

Sports Flooring Selection Guide

Thicknesses are starting points. For outdoor courts and tracks, we assess drainage, moisture, temperature changes and UV exposure before specifying the surface.

Indoor sports facilities

System	Typical applications	Thickness
Granule-backed sports PU	Multipurpose halls, futsal, volleyball, tennis, badminton and basketball	6–12 mm
Thin sports PU	Aerobics and light exercise	2–3 mm
Foam-backed roll flooring	Multipurpose halls, futsal, volleyball and basketball	4–10 mm
Tartan	Indoor running tracks	10–15 mm
Rubber granule flooring	Strength and fitness areas	Project-specific

Outdoor sports facilities

System	Typical applications	Thickness
Tennis court surfacing	Tennis courts	8–10 mm
Granule-backed PU with EPDM	Multipurpose courts, futsal, volleyball and basketball	6–12 mm
Tartan	Athletics tracks	10–15 mm
